

YEAR 13 ASSESSMENT GUIDANCE

All Saints Sixth Form College

March 2021

This document contains an overview of the broad topic areas that each subject will base their assessments around to support grade and at key stage 5 in 2021. This document should be used by pupils and parents to help plan and guide their revision. This document also includes a blank revision plan for pupils to map out their assessments and to organise their study.

Respect

Ambition

Resilience

Compassion

Dear Parent/Carers

Thank you for your continued support and patience in these challenging times. We are now in a position to outline the process of Teacher Assessed Grades (TAG) for Year 13 students. Using the official government guidance from Ofqual, we have planned a robust assessment programme which will ensure that any grades awarded are done so in an objective and fair manner. In line with the guidance, we will ensure:

- Grades are informed by a strong evidence base
- There is a rigid and robust quality assurance system in place including both internal and external sources of standardisation
- Judgements are only on what has been taught
- We will make it no easier or harder for a student to achieve a particular grade this year compared to previous years
- We provide appropriate access arrangements for students with additional needs in any formal assessments.

The majority of assessments will take place after Easter. These will take place in classrooms and in the exam hall, with both undertaken in controlled conditions. These will be assessed by subject teachers and will then go through a thorough quality assurance process both internally within the academy and through a range of external partners. The assessments will then form a significant part of the evidence base for us to award a teacher assessed grades. These assessments will largely be made up of resources to be provided by the examination boards. Included with this letter is an overview of what and when subjects will be assessing.

Further information will be provided to students by their teachers, but we are still awaiting final details from the exam boards. Therefore, can I reiterate that the details provided to parents and students regarding qualifications for 2021 are based on the information that we have currently been provided. There is, however, additional information that the examination boards have not yet provided, and this could cause alterations and changes.

The key message to our students is that they need to keep working; the vast majority of students will receive grades based on their most recent work involving the upcoming assessments. No grades will be awarded until the final stage of the

process. Teachers will not discuss grades with students. Students will receive final grades on the 10th of August 2021.

We are hosting a virtual parental event on Thursday 22nd of April at 5.45pm. During this time a presentation will be made but there will also be the opportunity to ask any questions that you may have. If you wish to forward any questions in advance to inform this event please do so to the following email: info@astn.uk . We will prepare a list of frequently asked questions and responses. A link for this presentation will be sent to all Y13 parents and carers next week (please let us know if your email address has changed).

It is important to note that throughout this process students will be not be informed of assessment outcomes in regard to marks or percentages and teachers will be unable to discuss grades. This is to ensure that all assessments are completed, collated and externally verified. We will provide general statements such as being in line with expectations or a discussion of skills and knowledge covered. We need to ensure accuracy through internal standardisation and external verification in order to arrive at a holistic grade.

Student guide for using the document:

This document includes all subjects, Students should:

- Identify the subjects that you are studying and highlight them
- If you need any clarification regarding the information in the document the first person to speak to is your subject teacher and then the subject lead as required.

An assessment calendar has also been issued so that students can make their own assessment timetable and plan revision accordingly.

As mentioned above it is really important that students work as hard as possible for these assessments and seek appropriate support from their teachers when required. There is a real opportunity for students to work with subject teachers to showcase their knowledge, skills and understanding in order to achieve the best grade possible.

Kind regards

Mrs Sing Headteacher
